

# The Voice Message Network

*The most powerful and the most important network to any business or organization*

*Nationwide 800 Service*

The AVC Voice Messaging Network is a powerful network of subscriber mailboxes that allows instant communication between various parties. A single call to an AVC Mailbox and detailed information can be exchanged with many other people, saving time and decreasing long distance expense.

Outside callers can leave detailed messages for you 24 hours a day. AVC will answer your calls with your personal greeting whenever you are unavailable.

Other subscribers can leave detailed messages for you which you can answer directly from your AVC Voice Mailbox. Messages can also be sent to distribution lists for many subscribers to hear or forwarded to other subscribers with additional comments.

You can leave detailed messages for your 3 guests that you have set up and they can leave answers for you. No more phone tag with important clients or family and friends.

## The Voice Message Network:

- AVC Voice Messaging Mailbox answers calls from outside callers when you are unavailable
- Other subscribers can be located down the hall or around the world ... instant communication is always available.
- Decrease the number of long distance calls to other subscribers ... use voice messaging instead
- Increase your employees' productivity
- Reply to other subscriber's messages with a single key stroke
- Forward messages to multiple subscribers with additional comments
- Establish guest mailboxes for 3 special clients or family
- Create voice memos for future delivery
- Accept FAX messages into your voice mailbox ... print when and where it is convenient
